Education

Graphic Era Hill University

Bachelor of Technology (Computer Science), (8.5 CGPA)

Aug. 2023 - June 2027

Projects

Text2Learn | *Node.js, Express, PostgreSQL, Redis, BullMQ, Gemini API, ChromaDB*

- Built an AI-powered course generation platform that converts any topic into structured modules, lessons, quizzes, and summaries using the **Gemini API**.
- Designed a background job queue using **Redis and BullMQ** to process LLM requests asynchronously, with automatic retries on failure.
- Integrated **RAG** with ChromaDB to retrieve relevant context before generation to improve relevance and accuracy of generated content
- Added rate limiting and response validation to ensure consistent output quality and reduce unnecessary API usage.

Code Mesh | *Node.js, Socket.IO, React, Docker, Piston API, Gemini API*

- Built a real-time collaborative code editor where multiple users can write and edit code simultaneously in shared rooms using **Socket.IO**.
- Developed a sandboxed code execution engine using **Docker and Piston API**, supporting **10+ languages** without exposing the host system.
- Handled concurrent edit conflicts to keep all connected users in sync without data loss.
- Integrated **Gemini API** to provide context-aware AI code suggestions and inline assistance during live sessions.

CleverCV | *React, Firebase, Gemini API*

- Built an AI resume builder that generates role-specific, ATS-friendly bullet points and summaries using **Gemini API** based on job descriptions.
- Implemented **Google OAuth** and email-based login via **Firebase Auth**, with real-time data persistence using **Firestore**.
- Designed a dynamic resume editor with multiple templates, customizable sections, client-side **PDF export**, and fallback handling for inconsistent LLM output.

Achievements

- Achieved **Knight** on LeetCode with a peak rating of **1928**, placing in the **Top 3% globally**.
- Solved **1500+ algorithmic problems** across LeetCode, Codeforces, CodeChef, and CSES, covering Graphs, Dynamic Programming, Trees, Greedy, Binary Search, and Advanced Data Structures.
- Selected for **Infosys Specialist Programmer (L2)** through the 2026 campus recruitment process, joining after graduation (2027).
- Achieved **Pupil (1252)** on Codeforces through regular participation in rated contests.
- Earned a **3-Star (1600+)** rating on CodeChef.
- Mentored **40+ students** in Data Structures and Algorithms through the university Competitive Programming Club.
- Secured **2nd Place** in College CodeFest among **100+ participants**.

Technical Skills

Languages: C++, JavaScript, SQL

Backend: Node.js, Express.js, REST APIs, Redis, BullMQ, WebSockets

Databases: MongoDB, PostgreSQL, ChromaDB

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Tools: Git, GitHub, Docker, Postman, Vercel

Relevant Coursework

- | | |
|----------------------------------|-------------------------------|
| • Data Structures and Algorithms | • Database Management Systems |
| • Object-Oriented Programming | • Computer Networks |
| • Operating Systems | |

Extracurricular Activities

We Code Club, GEHU Bhimtal | *MTS* Aug 2025 – Present

- Led a **20+ member team** in organizing coding contests and workshops, improving student participation.
- Established a peer mentorship program to strengthen DSA fundamentals among juniors.
- Organized a university hackathon with **800+ participants**, managing end-to-end execution.

National Service Scheme (NSS) | *Core Member*

- Contributed to **Computer Literacy Program (CLP)** by assisting in basic digital skills training for participants.
- Participated in **election awareness campaigns** and **blood donation drives**, supporting planning and on-ground execution.
- Collaborated with team members to organize and manage community outreach initiatives at the campus and local level.
